Grease Remover (125 ml)
Limespot Remover (125 ml)
Tannin Remover (125 ml)
Microfibre cloth

PRODUCT INFORMATION

APPLICATION INFORMATION

› Instructions

01. First try to remove the stain using Surface Care.

02. If the stain is not removed, then use one of the removers.

- For unknown stains: use them in the order listed below.
 - LIMESPOT REMOVER
Lime stains and other alkaline stains, e.g. fertilizers, radiator water, etc. Also: white rings, wine stains
 - GREASE REMOVER
Grease stains, e.g. olive oil, frying oil, crisps, oil, etc. Also: heel marks and floor polish
 - TANNIN REMOVER
Black/tannin stains e.g. urine, rust stains, rings/stains from cans, flower pots, etc. Also: after water damage on parquet; in case of efflorescence on exterior wood (on the bottom of gates, doors, on walls)
- For known stains: immediately use the correct remover.

03. If the stain has penetrated the wood too deeply, the spot can be sanded and re-oiled with the Spot Repair Set.

› Tips & Tricks

After treatment with a remover, you may need to apply some oil in the original colour on the spot. You can use the Spot Repair Set for this. If the surface becomes too stain-sensitive, maintain with Oil Plus 2C (in the original colour applied) to repair both colour and protection. The Care Set is ideal for this.

Check the packaging and the safety data sheet for more details.
